*Critical Pedagogy, Ecoliteracy, & Planetary Crisis* Richard V. Kahn 2010

We live in a time of unprecedented planetary ecocrisis, one that poses the serious and ongoing threat of mass extinction. Drawing upon a range of theoretical influences, this book offers the foundations of a philosophy of ecopedagogy for the global north. In so doing, it poses challenges to today's dominant ecoliteracy paradigms and programs, such as education for sustainable development, while theorizing the needed reconstruction of critical pedagogy itself in light of our presently disastrous ecological conditions.

*Terrorism As Crime* Mark S. Hamm 2007-03-01 Car bombing, suicide bombing, abduction, smuggling, homicide, and hijacking are all profoundly criminal acts. In *Terrorism as Crime* Mark S. Hamm presents an understanding of terrorism from a criminological point of view, arguing that the most successful way to understand, detect, prosecute and deter these acts is to use conventional criminal investigation methods. Whether in Oklahoma City or London, *Terrorism as Crime*

demonstrates that criminal activity is the lifeblood of terrorist groups and that there are simple common denominators at work that can remove the mystery surrounding many of these terrorist groups. Once understood the vulnerabilities of these organizations can be exposed. This important volume focuses in on six case studies of crimes committed by jihad and domestic right wing groups, including biographies of more than two dozen terrorists along with descriptions of their organizations, strategies, and terrorist plots. *Terrorism as Crime* offers an original and significant framework for explaining international and domestic terrorism, as well as how future acts might be detected or exposed.

*Pre-Incident Indicators of Terrorist Incidents* Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided,

planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents.
