**Plant-Metal Interactions** Sudhakar Srivastava 2019-07-26 Metal toxicity and deficiency are both common abiotic problems faced by plants. While metal contamination around the world is a critical issue, the bioavailability of some essential metals like zinc (Zn) and selenium (Se) can be seriously low in other locations. The list of metals spread in high concentrations in soil, water and air includes several toxic as well as essential elements, such as arsenic (As), cadmium (Cd), chromium (Cr), aluminum (Al), and selenium (Se). The problems for some metals are geographically confined, while for others, they are widespread. For instance, arsenic is an important toxic metalloid whose contamination in Southeast Asia and other parts of world is well documented. Its threats to human health via food consumption have generated immense interest in understanding plants' responses to arsenic stress. Metals constitute crucial components of key enzymes and proteins in plants. They are important for the proper growth and development of plants. In turn, plants serve as sources of essential elements for humans and animals. Studies of their physiological effects on plants metabolism have led to the identification of crucial genes and proteins controlling metal uptake and transport, as well as the sensing and signaling of metal stresses. Plant-Metal Interactions sheds light on the latest development and research in analytical biology with respect to plant physiology. More importantly, it showcases the positive and negative impacts of metals on crop plants growth and productivity.

*COMMUNITY RADIO AS AN AGENT OF SOCIAL CHANGE – A COMPARATIVE STUDY OF SANGAM AND NAMMA DHWANI* Dr. B. SUNIL 2021-05-03 There exists no doubt, considering the proactive role of mass communication in gathering, disseminating and gauging the public opinion and motivating them towards a desired change. This role by mass media is more important, particularly, in India where citizens are being seen as information starving and being deprived of much required knowledge to better their lives. Studies in the past have pointed out that, media have and continues to play an important and decisive role in nations that are categorized as third world countries, in bringing about development and leading to a predetermined social change. Furthermore, media can play an independent and objective role in a democratic political setup in India, by bringing forth various opinions and ideas, thereby nurturing an informed citizen about the polices, developments and issues concerning them.

Developed over a century ago by fusing national values with battlefield imperatives, its approach has been fine-tuned over generations. It is now an adaptable and egalitarian leadership culture that ticks all the boxes for best practice. The military assumes no-one is born a natural leader, and that good training makes good leaders. Drawing on his own long military career and defence training programs, and on research, Nick Jans has identified the core principles of this consistently successful approach to leadership. These '3Rs' are the leadership skills which generate loyalty and commitment at an operational level, and they are just as successful in everyday team management as they are in the field. Leadership Secrets of the Australian Army includes real stories from the field and from workplaces, from everyday employees and from well-known leaders. It shows how you too can become a leader your team can believe in, and-equally importantly-how you can help them believe in themselves. 'Read it and be wise.' **Transnational Communities** Marie-Laure Djelic 2010-05-20 Transnational communities are social groups that emerge from mutual interaction across national boundaries, oriented around a common project or 'imagined' identity. This common project or identity is constructed and sustained through the active engagement and involvement of at least some of its members. Such communities can overlap in different ways with formal organizations but, in principle, they do not need formal organization to be sustained. This book explores the role of transnational communities in relation to the governance of business and economic activity. It does so by focusing on a wide range of empirical terrains, including discussions of the Laleli market in Istanbul, the institutionalization of private equity in Japan, the transnational movement for open content licenses, and the mobilization around environmental certification. These studies show that transnational communities can align the cognitive and normative orientations of their members over time and thereby influence emergent transnational governance arrangements.

*Reshaping Urban Conservation* Ana Pereira Roders 2019-02-07 This volume focuses on the implementation of the 2011 UNESCO Recommendation on the Historic Urban Landscape (HUL approach), designed to foster the integration of heritage management in regional and urban planning and management, and strengthen the role of heritage in sustainable urban development. Earlier publications and research looked at the underlying theory of why the HUL approach was needed and how this theory was developed and elaborated by UNESCO. A comprehensive analysis was carried out in consultation with a multitude of actors in the twenty-first-century urban scene and with disciplinary approaches that are available to heritage managers and practitioners to implement the HUL approach. This volume aims to be empirical, describing, analyzing, and comparing 28 cities taken as case studies to implement the HUL approach. From those cases, many lessons can be learned and much guidance shared on best practices concerning what can be done to make the HUL approach work. Whereas the previous studies served to illustrate issues and challenges, in this volume the studies point to innovations in regional and urban planning and management that can allow cities to avoid major conflicts and to further develop in competitiveness. These accomplishments have been possible by building partnerships,

devising financial strategies, and using heritage as a key resource in sustainable urban development, to name but a few effective strategies. For these reasons, this volume is primarily pragmatic, linked to the daily work and challenges of practitioners and administrators, using specific cases to assess what was and is good about current practices and what can be improved, in accordance with the HUL approach and aims.
